

YOUR TRUSTED ALLY IN CLINICAL CHEMISTRY

ELITechGroup Clinical Systems have performance and quality designed into the complete system across all key components:

- Analyzers
- Liquid stable reagents
- Calibrators & controls
- ISE*
- Service and training

With a strong heritage of reliability and performance since 1956, with Selectra Family solutions your laboratory can grow with confidence.

From small to mid-sized laboratories, there is a distinct Selectra Family member that will provide you with an efficient and cost effective solution. Each Selectra family member has a common user interface and universal system reagents, which means an almost seamless transition between family members.

* Ion-Selective Electrode

SELECTRA SOLUTIONS GROW WITH CONFIDENCE

ELITECHGROUP

ELITechGroup is a global leader in Clinical Chemistry, with over 50,000 systems delivered. Our scalable systems are designed around the laboratory's most important needs – reliability and consistency.

ELITechGroup has continued to expand, driven by investment in R&D, strategic partnerships and direct market investment, to become a leading supplier to clinical chemistry, microbiology, hematology and molecular diagnostic laboratories.

Today and tomorrow. Grow with confidence.

EM490 - GEN. REVISION DATE: 10/2023

Mach5

You require additional capacity in your mid-sized core laboratory or network of satellite laboratories

Selectra Mach[®]5

Fully integrated, next-generation benchtop solution

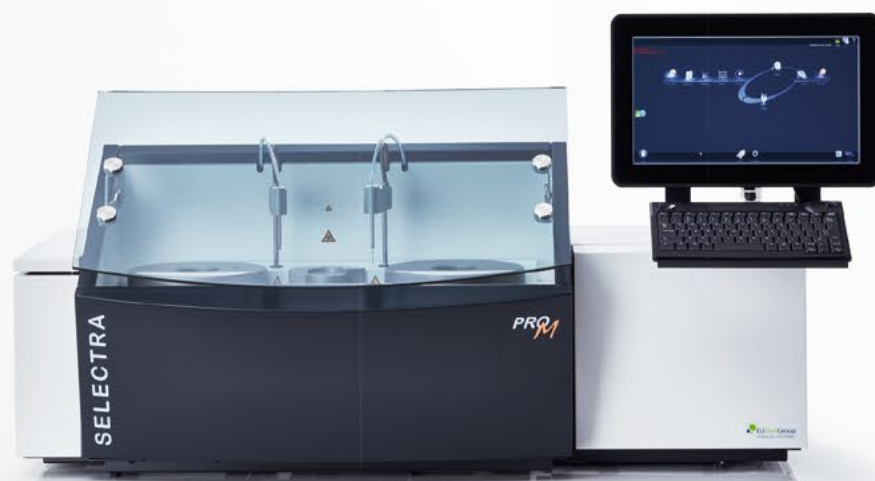

- Throughput range 250-500 photometric tests/hour
- Maximum efficiency through consolidation of routine and special testing
- Broad test menu and ready-to-use, validated, barcoded reagents
- Intuitive user interface and accessible sample area with primary tube sampling

Your operation is growing in to a mid-sized laboratory

Selectra ProM[™]

Fully automated benchtop solution

- Typically 180 tests/hour*
- Optional dry ISE
- The smartest choice for your growing laboratory needs
- Integrated touchscreen with Best-in-Class operator interface

ProM

SELECTRA SOLUTIONS HIGH QUALITY CE-IVD* VALIDATED BENCHTOP ANALYZERS AND REAGENTS FOR CLINICAL CHEMISTRY.

* Analyzers and solutions for Analyzers are compliant with CE-IVDR (2017/746). For reagents, calibrators, and controls compliance with European In vitro Diagnostic Medical Device Regulations (IVDR) is pending.

The Selectra reagent line, consisting of liquid stable ready-to-use reagents, calibrators, controls and consumables are an integral part of the Selectra Pro & Mach5 systems.

For reliable and consistent performance across all automated members of the family

Selectra reagent line

Integrated system of reagents, calibrators and controls

- Ready-to-use, liquid stable, barcoded reagents to minimize errors
- Reproducible performance across the Selectra Family
- European design and manufactured CE-IVD* validated system reagents

* Analyzers and solutions for Analyzers are compliant with CE-IVDR (2017/746). For reagents, calibrators, and controls compliance with European In vitro Diagnostic Medical Device Regulations (IVDR) is pending.

Anaemia | Cardiac | Diabetes | General Chemistry | Specific Proteins & Special Chemistry | Ion Selective Electrode Consumables | Calibrators | Controls

* Assuming combinations of photometric and ISE tests

You run an established small or satellite laboratory

Selectra ProS[™]

Compact fully automated benchtop solution

- Up to 133 photometric tests/hour, plus optional dry ISE
- Complete system with small footprint
- Integrated touchscreen with Best-in-Class operator interface

ProS

You pursue a low-volume start-up laboratory or require a backup system or higher quality solution

Microlab 300

Semi-automated benchtop solution

- Industry benchmark
- Robust, long-lasting components
- Easy to use and near-zero maintenance

Microlab
